- ✓ Instructor-Led Courses
- ✓ Interactive Content
- ✓ PowerPoint Conversion
- ✓ Self-Paced Courses
- ✓ Storyboarding
- ✓ Template Management
- ✓ Test / Quiz Creation
- ✓ Video Management

Meaningful Insights

Infasure Services

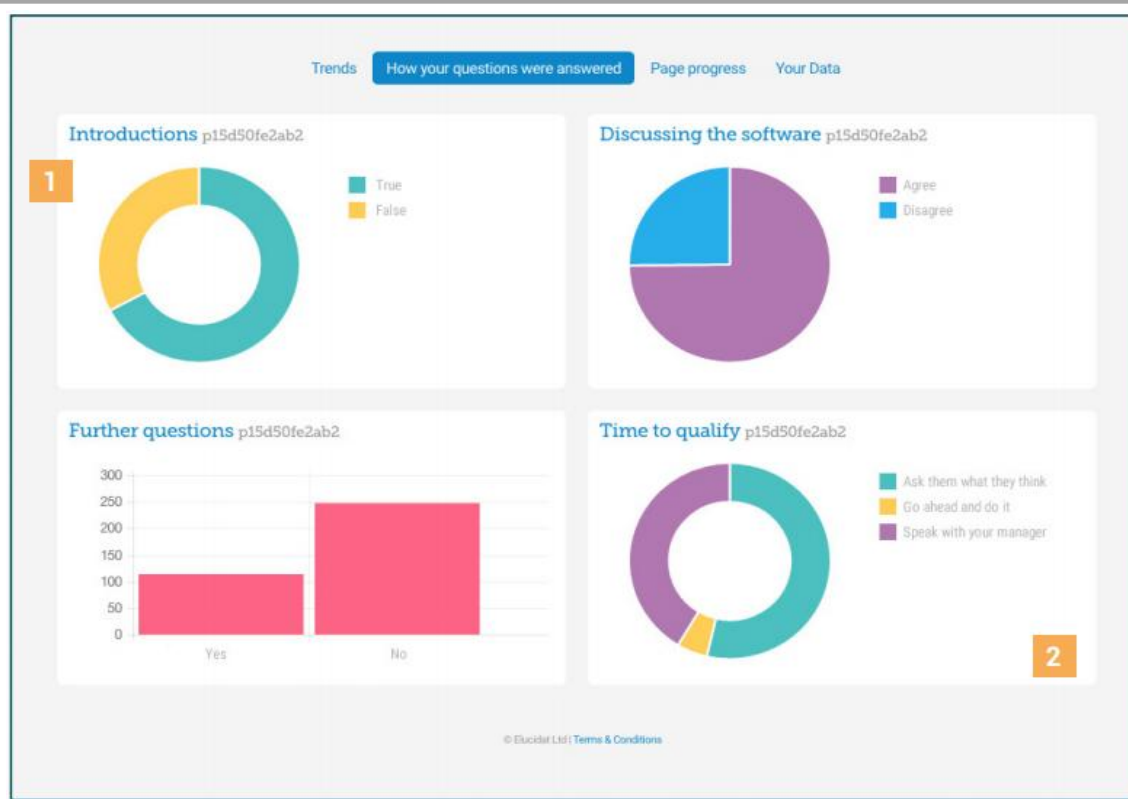

1 Monitor sessions vs. total users. Are users coming back for more?

2 Does completion matter to your project? If it's a linear experience, is everyone getting through to the end? If not, why? If it's a range of performance topics that learners can explore freely, look instead at which pages/topics are visited, and by whom.

3 Are you reaching your target number of users, and in the locations you are aiming for? Do you need to market your product more in certain areas, or help it spread virally?

4 What devices are being used, and how does this differ from your expectations and the way your learning is designed? Can you do more to make it mobile-friendly?

5 Session times are a great indicator of interest, but also "learning windows." What might be the optimum topic length?
