Infosure Business Automation Pico
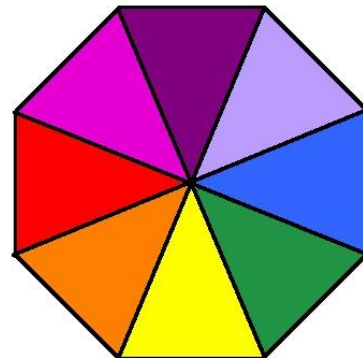

The most significant IT change forever

Happily go anywhere like an aardvark, no network, no cloud required.

Infosure Business Automation Pico is an open source instant business automation platform. Take advantage of prebuilt packaged automation in Financials, Human Resources, Sales, Projects and IT maintenance areas. Infosure Automation application is built on top of the Odoo open source application. Infosure Platform runs on a 1 Tb external hard drive as an Odoo 11 VM on Ubuntu 17.10 Artful Aardvark. The VM can typically run from a laptop of minimum 4Gb memory or a desktop.

Delivered in 10 days, it is ready to start the implementation.

The typical customer is a company that has just 1 employee. A Teacher, Doctor, Lawyer, Architect, Artist, Sportsman, Chef, Farmer, Fashion Designer, Fleet Operator, Engineer, Businessman or an Open Source Enthusiast. The internet is only required when you communicate to the external world.

The mode of implementation is self implementation. Price does not include 3 months implementation that can be provided on request additionally and borne by client separately.

Benefits of Infosure Business Automation Pico

- ✓ Significant reduction TCO
- ✓ Significant improvement in performance
- ✓ Reduce operational risks
- ✓ Lifetime support policy
